The Big Bang Theory by Barenaked Ladies

Our whole universe was in a hot dense state,
Then nearly fourteen billion years ago expansion started.
Wait...
The Earth began to cool,
The autotrophs began to drool,
Neanderthals developed tools,
We built a wall (we built the pyramids),
Math, science, history, unraveling the mysteries,
That all started with the big bang!
"Since the dawn of man" is really not that long,
As (1)_____ galaxy was formed in less time than it
(2)_____ to sing this song.
A fraction of a second and the elements were made.
The (3)_____ stood up straight,
The dinosaurs all met their fate,
They tried to leap but they were late
And they all (4)_____ (they froze their asses off)
The oceans and pangea

See ya wouldn't wanna be ya
Set in motion by the same big bang!
It all started with the big BANG!
It's expanding ever outward but one day
It will (5)_____ then start to go the other way,
Collapsing ever inward, we won't be here, it won't be hurt
Our best and brightest figure (6)_____ it'll (7)_____
an even bigger bang!
Australopithecus would really have (8)_____
(9)_____ of us
Debating why were here they're catching deer (we're catching
viruses)
Religion or astronomy, Encarta, Deuteronomy
It all (10)_____ with the big bang!
Music and mythology, Einstein and astrology
It all started with the big bang!
